

POSITION	Project Manager (Estimator)
DURATION	Permanent
LOCATION	Winnipeg, Manitoba
SALARY	\$80,000

About Our Client.

Ranked as a top employer in Canada, our client is a distinguished organization that has transformed its industry by offering a highly unique value proposition in niche markets. This organization has clients in Canada and around the Globe; consistently being regarded as a leader within its industry. Our client provides the compensation, modern work environment, and entrepreneurial culture to succeed. You will feel like being part of a family.

The Challenge.

You will interface and work closely with clients, management, and trades in the shop floor to deliver designs, estimates, and final products. Management will train fully on the Project Management and estimating part of the role. However, some experience in purchasing materials, working with subcontractors, budgeting, negotiation, scheduling, and risk assessment is considered an asset.

About You.

We are looking for critical thinkers with strong mechanical aptitude. You have completed your studies in **Mechanical or Structural Engineering technology** from the Red River College, and have knowledge in all aspects of fabrication. Experienced in CWB, ASME, API, COR, and SMACNA construction, design, safety, welding codes, and testing would be an asset. The right individual will be a self-starter who is confident in their technical abilities, and is a quick learner.

- Mechanical or Structural Engineering Technology diploma
- 2+ years of experience or combined knowledge in fabrication

What We Offer

We offer an environment where employees feel like they are part of the family. An environment where there is great opportunities to learn all aspects of project delivery cycle, and other perks such as half day Friday's.

All qualified applicants will receive consideration for employment. If you qualify for this position, we encourage you to apply by submitting a cover letter and resume
