

**POSITION** Project Manager (AI Bots)  
**DURATION** Permanent  
**LOCATION** Winnipeg, Manitoba  
**SALARY** Commensurate with experience (\$120,000)

### About Our Client.

Our client is a prestigious and International organization that focuses on building AI-powered solutions to deliver conversational experiences. You will be surrounded by a team of highly qualified and talented team located in Canada and offices all over the world architecting and leading the development team. This client provides the environment that includes the excitement of working with Artificial Intelligence, machine learning, and natural language processing, while working with Fortune 500 clients and new tools such as **WhatsApp Business API**.

### The Challenge.

Manage world-class conversational applications projects. For example, a global luxury retailer is interested in exploring new digital channels to increase customer engagement and has partnered with us to develop a Facebook Messenger chatbot. You will define project scope, requirements, and use cases. Conduct discovery sessions to build use cases and user stories. Determine resource and budget requirements, cost estimates, and timelines. Implement **Agile** delivery methodologies; focus on iterative sprints. Use **PM** tools such as JIRA for progress and time tracking. Act as the point person to manage tasks and workflows. Finally, ensure the project is a success by delivering a highly engaging bot!

### About You.

You have 5+ years of PM experience delivering IT projects, and proven success delivering projects. Experience working with QA, Development, DevOps, Product, Designers, and Account Managers. Success delivering projects within scope, budget and requirements. You are interested in conversational experiences such as Facebook Messenger bots, WhatsApp bots, Slack bots, Alexa bots, Telegram bots, Google Assistant, etc. You have excellent communication skills at the technical and non-technical level. You have an entrepreneurial spirit and take ownership of projects. You enjoy learning and effectively collaborating with a team who is passionate toward delivering a solution.

*All qualified applicants will receive consideration for employment. If you qualify for this position, we encourage you to apply by submitting a cover letter and resume to [careers@masarykco.com](mailto:careers@masarykco.com)*
