

POSITION Third Class, Power Engineer (working towards Second Class program)
DURATION Permanent
LOCATION Carberry, MB
SALARY \$85,000+ (Commensurate with experience) + Benefits + Relocation

About Our Client.

Our client is a leading food processing company committed to innovation, excellence, and safety.

The Challenge.

- Operate refrigeration plant and associated equipment to support operational objectives effectively.
- Ensure completion of all necessary documentation and adherence to established testing and monitoring procedures.
- Perform assigned maintenance tasks as required to uphold equipment performance.
- Actively contribute to the continuous improvement of plant operating methods, aiming to meet or exceed Key Performance Indicators.
- Participate in safety training related to ammonia operation, promoting a culture of safety among peers and team members.
- Fulfill any additional duties as assigned by management.

Qualifications.

- Hold a valid 3rd Class Engineer's Certificate.
- Willingness to work rotating shifts in a plant environment.
- Commitment to ongoing personal development, with a goal of attaining a 2nd Class Engineer's Certificate.
- Demonstrated history of practicing safe work habits.
- Preference given to candidates with experience in ammonia refrigeration systems.
- Proficiency in using computerized operational controls.
- Ability to collaborate effectively with plant supervision and production employees.

All qualified applicants will receive consideration for employment. If you qualify for this position, we encourage you to apply by submitting a cover letter and resume to ao@masaryk.co
